

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### **Usage guidelines**

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

CAPTAINS are particularly requested to make a minute in their Signal Book of any sentence, word, or port, &c., that they may from time to time not find in this Code, and to transmit the same to MESSRS. RICHARDSON & Co., 23, Cornhill, London.

INSERTION OF NAMES.—Owners and Captains desirous of having the names of their vessels inserted in this Code are requested to apply (post-paid and covering the return postage) to MESSRS. RICHARDSON & Co., 23, Cornhill, London.

The Flag of any Foreign Vessel must be stated.

SUPPLEMENTS.—The supplementary pages to complete the list of ships' names will be supplied on payment of 1s. If required to be sent by post to any part of the United Kingdom, the sum of 1s. 2d. must be transmitted in postage stamps, and the name terminating the last *completed page* be given.

FLAGS.—The Flags used in this Code of Signals are supplied by MESSRS. RICHARDSON & Co., of the very best Bunting, all roped and bagged, at the following prices:—

### ELECTRIC TELEGRAPH.

A SIGNAL STATION, provided with the Flags of this Code, having recently been erected by THE ELECTRIC AND INTERNATIONAL TELEGRAPH COMPANIES at HURST CASTLE on the main, opposite Yarmouth (in the Isle of Wight), for the purpose of receiving communications from Vessels in the offing for transmission to any place in EUROPE embraced by the Electric and International Telegraph Companies' system, Captains of Vessels are informed they can hereby signal their arrival or departure, or lie to while waiting for orders from their Owners or Consignees.

---

### THE DOWNS, &c.

MASTERS of Merchant Vessels are required, upon arrival in the Downs, or at any Port or Place of general Rendezvous, to make their Number (corresponding with the name of their Vessel, which will be found in the Third Part of this Code), and to continue the same (if all well) every day, from twelve till one o'clock, during their detention; in order that the Agent for Lloyd's may have a daily account of the situation and proceedings of the Shipping, for the general information of the Owners and Underwriters.

When the Signal is intended for the Agent for Lloyd's, the Union Jack should be hoisted at the Main, as a preparatory notice.

The Signal of the Agent for Lloyd's will be kept flying at Southend, Deal; it is a White Flag, lettered "LLOYD'S."

---

### LIVERPOOL AND HOLYHEAD TELEGRAPHS.

MASTERS of Vessels within signaling distance of any of the Liverpool and Holyhead Telegraphs are requested to hoist the Number of their Ship, and when Inward bound, the Number of the Port from whence she has sailed.

---

### NEW SOUTH WALES.

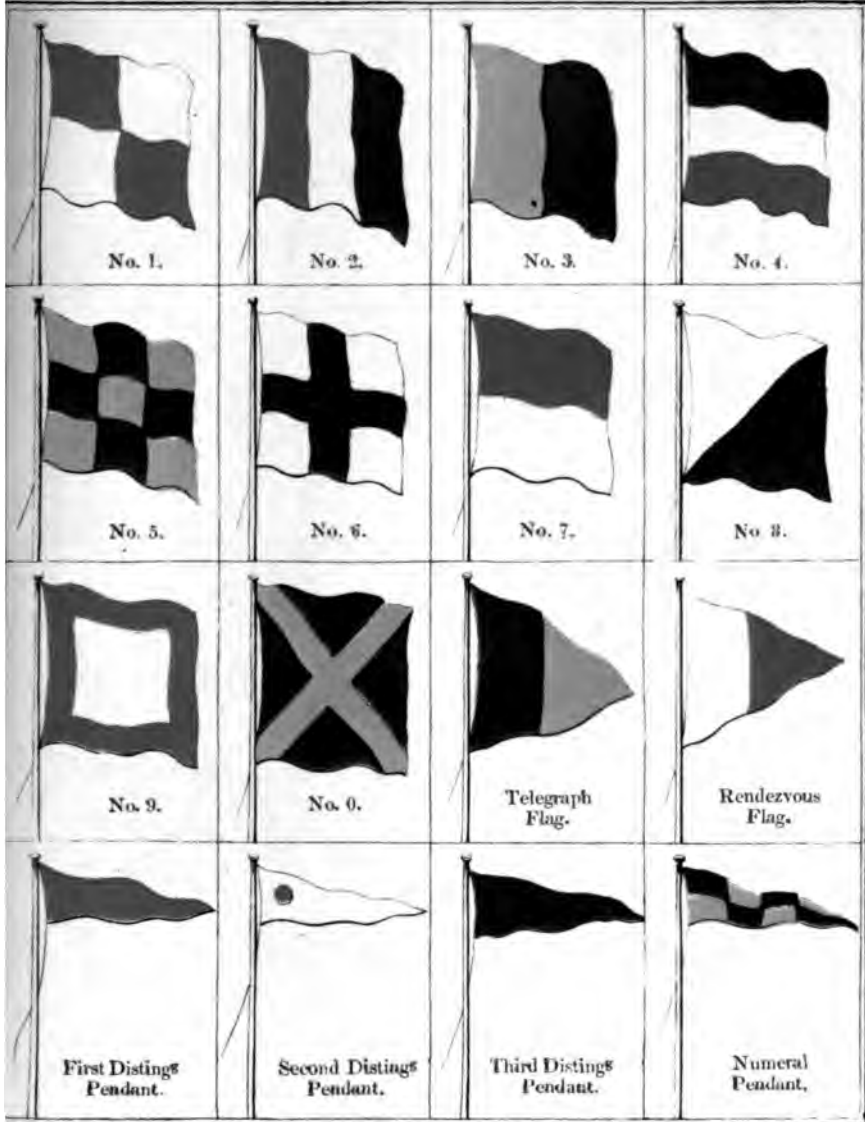

MASTERS of Vessels making Port Jackson are requested to show their Number, in order that it may be notified to Sydney by the Telegraph on the South Head.

## P R E F A C E

TO THE EDITION OF 1866.

---

IN the preparation of this new Edition of "The Universal Code of Signals for the Mercantile Marine of all Nations," I have determined after much consideration to introduce a Fourth Distinguishing Pendant as best calculated to meet the present requirements of the Code. Eventually, I hope to be able to remove from Part III. of the Code the names of those Merchant Vessels which, having been inserted many years past, have now no existence, but it has not appeared to me expedient to do so on the present occasion.

The List of Ports, Lighthouses, &c., have been corrected according to the latest authorities, and some additional words and sentences inserted in Part V; the Regulations for preventing Collisions at Sea, issued under an Order of Council, dated January 9th, 1863, are also given in lieu of those previously in force.

With the view to facilitate the means of communication between Yachts and Merchant Vessels I have for the first time introduced a correct List of Yachts, with their tonnage and rig. The names are arranged alphabetically, and a separate number is appropriated to each. The Club Burgee is to be hoisted over the No., to distinguish the Signal from the other parts of the Code. Each Yacht will thus have a permanently fixed number, and may, when in communication with the Ships of the Mercantile Marine, either report them, or be reported. Should this lead to the more frequent use of the Universal Code by Yacht owners when at sea, it is believed it will in its results prove to be mutually advantageous to themselves and the Merchant Captains. The numbers appropriated to Yachts commence with those composed of 4 digits, and this will permit me hereafter to appropriate those from No. 1 to 987 to Signals specially adapted to yachting purposes, which requiring only 3 flags at a hoist can be used with great celerity.

Let me again renew the suggestion made in former Editions, that Captains of vessels should thoroughly acquaint themselves with the Sentences inserted in Part V, and the Vocabulary in Part VI, as this will enable them to express their wants and wishes with much greater facility and with less chance of misapprehension.

G. B. RICHARDSON.

*London*, 1866.

## GENERAL EXPLANATION.

---

The Code consists of Six Parts :—

1. A List of English Men of War.
2. A List of Foreign Men of War.
3. A List of Merchant Ships of all Nations.
4. A List of Lighthouses, Ports, Headlands, Rocks, Shoals, Reefs, &c.
5. A Collection of Sentences.
6. The Vocabulary.

Every number being omitted in which the same figure occurs twice, as in 101, 556, &c., a substitute flag and pendant are rendered unnecessary ; but as substitutes will at times be required, the First, Second, and Third Distinguishing Pendants and the Telegraph Flag are used for this purpose, the explanation of which are given in detail on page viii., and in Plate No. 3.

The Flags and Pendants, as exemplified in Plate No. 1, are seventeen in number, exclusive of

The *Union Jack*, which is hoisted over the Number of an *English Man of War* in Part the First, and are as follows :—

The *Ten Numerical Flags*, which represent the ten figures in arithmetic, and are used throughout the General Code.

The *First, Second, Third and Fourth Distinguishing Pendants*, which are hoisted over the number, or at some other mast-head when the number of a merchant vessel is shewn in Part the Third.

The *Rendezvous Flag*, which is hoisted over the number of Lighthouses, Ports, Headlands, &c., in Part the Fourth, and occasionally at some other mast-head, or below the number, as explained at the head of the List of Ports, Headlands, &c.

The *Telegraph Flag*, which is hoisted at some other mast-head when the numbers in Part the Sixth are shewn.

The *Numeral Pendant*, which is hoisted over a number when merely the figures are intended to be shewn, and is hoisted between the numbers as a *Period*, or when the latitude or longitude is required, and is hoisted singly as the *Answering Pendant*.

The Sentences in Part the Fifth have no distinguishing flag, but are represented by the numeral flags alone.

## GEOMETRICAL SIGNALS.

The Geometrical Signals are intended to facilitate the use of the Code during light winds and calms, or when, from distances, the intermixed colours of the flags are not easily distinguished, and consist of certain Forms or Symbols in place of the Flags and Pendants, as exemplified in Plate No. 6, and are as follows :—

The 5 forms colored *Red*, which represent the numeral flags Nos. 1 to 5.

The 5 forms colored *Blue* (or *Black*), which represent the numeral flags Nos. 6 to 0.

The *Red Hexagon*, which represents the *First Distinguishing Pendant* when hoisted *over* the number, and the *Union Jack* when hoisted *under* the number, and denotes the *affirmative* when hoisted *singly*.

The *Blue* (or *Black*) *Hexagon*, which represents the *Second Distinguishing Pendant* when hoisted *over* the number, and the *Rendezvous Flag* when hoisted *under* the number, and denotes the *negative* when hoisted *singly*.

The *Yellow* (or *White*) *Hexagon*, which represents the *Third Distinguishing Pendant* when hoisted *over* the number, and the *Numeral Pendant* when hoisted *under* the number, and the *Telegraph Flag* when hoisted at *some other mast-head*, and is the *answering Pendant* when hoisted *singly*.

The *Red* and *Yellow Hexagon*, which represents the *Fourth Distinguishing Pendant*, when hoisted *over* the number.

To avoid the necessity of an increased number of forms or symbols, the use to which the *Rendezvous Flag* is occasionally applied, as explained at the head of the List of Ports, Headlands, &c., is not provided for, but the *Rendezvous Flag* may be used in conjunction with the numeral Forms or Symbols for this purpose.

These Signals are manufactured by Messrs. Richardson & Co., of Dungaree, with galvanized iron expanders, and are so constructed that they can be distinguished from all points of the compass, yet they occupy a trifling space when not in use.

---

 SUBSTITUTES OR NUMERAL REPEATERS.

When a number is required to be shewn, containing two or more similar digits, such as 2323 or 23232, it is necessary to make use of Substitutes or Repeaters of the Flags representing the digits required to be repeated. The

First, Second, and Third Distinguishing Pendants, and the Telegraph Flag, are used for this purpose, as follows:—

The *First Distinguishing Pendant* as the Substitute or Repeater of the top Flag in the hoist.

The *Second Distinguishing Pendant* as the Substitute or Repeater of the Second Flag from the top.

The *Third Distinguishing Pendant* as the Substitute or Repeater of the Third Flag from the top.

The *Telegraph Flag* as the Substitute or Repeater of the Fourth Flag from the top.

N.B. Illustrations and examples of the foregoing will be found in the annexed Plate.

By this arrangement every number can be made up to 99,999; but should a Substitute for the Fifth Flag in the hoist be at any time required, the *Rendezvous Flag* can be employed for this purpose, which will not interfere with its use in connection with Part V, as in this high denomination of numbers it must necessarily be one of Six Flags.

---

## NIGHT SIGNALS.

The Night Signals require the use of four ordinary ship's lamps, capable of being suspended one below the other, from the gaff or other place where best seen. Four bags or pieces of red bunting must be prepared to fix upon or take off the lamps, to change their colour from white to red, or red to white, as may be required, and these bags should be easily removable from one lamp to another so as to avoid any loss of time. By this simple means there are placed at immediate disposal four white and four red lights, capable of thirty different combinations.

The system employed is founded on the Roman numerals I and V,—

A Single White Light representing the Roman numeral I,

A Single Red Light representing the Roman numeral V,

and every digit of a number is made by a separate Signal, and the Distinguishing Signal is shewn when the number is completed; thus not only denoting the part of the Code intended to be shewn, but serving as a stop signal, or to denote that the digits before signalled complete the number intended to be given.

The numbers 1 to 9 and 0 are made as represented in the annexed Plate, and can be understood by the person signalled to as easily as the figures on the dial of a clock. The arbitrary combinations of the lights are employed

16 Distinguishing Signals, and should be committed to memory to facilitate the use of the system; but it may be observed as a *memoria technica*, that all the Distinguishing Signals are made with four lights, and the three combinations of lights, denoting the 1st, 2nd, and 3rd Distinguishing Pendants, are those with the two Red Lights together, —

16 *First Distinguishing Pendant* is denoted by two Red Lights *above* two White Lights.

16 *Second Distinguishing Pendant* is denoted by two Red Lights *between* two White Lights.

16 *Third Distinguishing Pendant* is denoted by two Red Lights *below* two White Lights.

16 *Fourth Distinguishing Pendant* is denoted by Red and White Lights alternated, Red at the *top*.

16 *Port IV, Ports, Headlands, &c.*, is denoted by White and Red Lights alternated, White at the *top*.

16 *Port V, Sentences*, is denoted by three White Lights above one Red Light.

16 *Port VI, Vocabulary*, is denoted by three Red Lights above one White Light.

16 *Port I, H. M.'s Vessels of War*, is denoted by four White Lights.

16 *Numeral Signal* is two White Lights between two Red Lights, denoting that Numerals alone are intended.

16 *Cancelling Signal* is two Red Lights above one White Light, forming No. XI, to be used when it is desired from any cause to cancel the previous Signal made.

00 *White Lights*, as an Answering Signal, is the Affirmative.

16 *White Light between two Red Lights*, as an Answering Signal, is the Negative.

16 *Red Light between two White Lights*, denotes that the Signal is not understood.

It is very desirable the answering ship should repeat the Signals made, but as this may not be practicable from the want of the necessary lamps, the answering vessel, by shewing the native Signal, or a single white light, shewn by the answering vessel, denote that the Signal has been made out, and the vessel signalling should not vary the lights she has hoisted until they have either been repeated or an affirmative light has been shewn.

As since there may be much uncertainty as to the exact position of any light with which communication is desired, it will be necessary, in the first instance, to give a signal sufficiently bright to command immediate notice. For this purpose a flash made by gunpowder, the burning of a piece of tow or turpentine, or indeed anything calculated to make a brilliant light for a short period of time will answer, and this blaze or flash should be

repeated by the answering vessel: this will serve to denote the bearings of each to the other, and at the same time express the desire to exchange Signals.

The plate annexed gives a representation of a signal lamp designed by Mr. Richardson to facilitate the use of the night signals. The lamp travels up and down in a frame of strong iron wire, being raised and lowered by a line passing through small iron sheaves and reaching to the deck. The lower part of the frame being covered with a piece of sailcloth or any opaque article, the lamp when at rest will be eclipsed; the upper part being surrounded with red bunting, the middle lamp when raised to the top of the frame will emit a red light; the middle of the frame being uncovered, the lamp when half raised will emit a white light. By the use of four of these lamps suspended each from the other and their several lines reaching to the deck, the night signals may be used with the same facility as a semaphore.

---

### FOG SIGNALS.

The Fog Signals are founded on the system employed for the Night Signals, viz., Roman Numerals, and are equally simple and effective. The report of a single gun or musket, the blast of a steam whistle, or any other sound capable of being distinctly heard at the distance intended to be reached, represents the Roman Numeral I. The report of two guns, muskets, &c., at short intervals, represents the Roman Numeral V. Three reports, at short intervals, denote Part V, or Sentences, the part of the Code of most use under the circumstances in which Fog Signals would be required; but the system can easily be adapted to the whole Code as follows:—

Part VI, the Vocabulary, to be denoted by four reports, at short intervals.

The First Pendant to be denoted by five reports, at short intervals.

The Second Pendant	„	six	„	„
The Third Pendant	„	seven	„	„
The Fourth Pendant	„	eight	„	„
Part IV, Ports, Headlands, &c.,	„	nine	„	„
Part I, H.M.'s Vessels	„	ten	„	„

The signal of two guns, muskets, &c., fired at short intervals, should be first given, and be occasionally repeated until it is answered by the same signal, and it must clearly be understood that no signal has any other meaning attached to it until the answering signal has been made.

An interval of as short a time as possible to ensure distinctness should elapse between the two reports representing the numeral V.

An interval of fifteen seconds should elapse between the single reports.

An interval of thirty seconds should elapse between the signals representing each digit.

It is, however, possible that longer intervals than those named might be necessary, or again with small arms less intervals would suffice; it will, in either case, be only necessary to adhere to the relative proportions the different intervals bear to each other.

In using the Fog Signals it will be even more desirable than with the Night Signals to repeat the signals made; but should this not be practicable, the signal of two reports, at close intervals, will be necessary as an answering signal.

Two reports, and one report from the answering vessel, should denote that the signal was not understood.

Two reports, two reports and one report, forming No. XI, should be the cancelling signal, to be used when it is desired to cancel the previous signal made.

**PORTS, HEADLANDS, AND HARBOURS. PART IV.**

**RENDEZVOUS FLAG**

*To be hoisted over the Number.†*

**PORTS, HEADLANDS, AND HARBOURS.**

*Any vessel, after having made her Number, wishing to indicate the Port she belongs to, must hoist the Rendezvous Flag over the No. of the Port.*

*Any vessel wishing to indicate the Port she has sailed from, must hoist the Rendezvous Flag under the No. of the Port.*

*Any vessel wishing to indicate the Port she is bound to, must make the No. of the Port, and at the same time hoist the Rendezvous Flag at some other mast-head.*

*Any vessel speaking of a Port generally in telegraphing, must hoist the Rendezvous Flag over the No. of the Port shewn.*

This only applies to day signals; at night the words of, from, to, must be used.

N.B.—The Number of any Lighthouse can be used to designate a Port of the same name, should it not be found in the List of Ports, Headlands, &c.

END OF PART VI.

## REGULATIONS FOR PREVENTING COLLISIONS AT SEA.

Issued in pursuance of the Merchant Shipping Act Amendment Act, 1862, and of an Order in Council, dated 9th January 1863.

1. By virtue of the 'Merchant Shipping Act Amendment Act, 1862,' and of an Order in Council dated January 9, 1863, the following regulations, containing certain verbal Amendments, are substituted for the Regulations contained in the Schedule to the Act.

2. The following Regulations come into operation on June 1, 1863.

3. The following Regulations apply to all Ships, whatever their Nationality, within the limits of British Jurisdiction, and to British and French Ships, whether within British Jurisdiction or not.

4. The Order in Council containing these Regulations is published in the 'London Gazette' of January 13, 1863.

T. H. FARRER,  
*Assistant Secretary, Marine Department.*

BOARD OF TRADE :  
*January, 1863.*

### *Preliminary.*

Art. 1. In the following Rules every Steam Ship which is under Sail and not under Steam is to be considered a Sailing Ship; and every Steam Ship which is under Steam, whether under Sail or not, is to be considered a Ship under Steam.

### *Rules concerning Lights.*

Art. 2. The Lights mentioned in the following Articles, numbered 3, 4, 5, 6, 7, 8, and 9, and no others, shall be carried in all Weathers, from Sunset to Sunrise.

Art. 3. Seagoing Steam Ships when under weigh shall carry :

(a) *At the Foremast Head*, a bright White Light, so fixed as to show an uniform and unbroken Light over an Arc of the Horizon of 20 points of the Compass; so fixed as to throw the Light 10 points on each Side of the Ship, viz. from right ahead to 2 Points abaft the Beam on either Side; and of such a Character as to be visible on a dark Night, with a clear Atmosphere, at a Distance of at least Five Miles :

(b) *On the Starboard Side*, a Green Light, so constructed as to throw an uniform and unbroken Light over an Arc of the Horizon of 10 Points of the Compass; so fixed as to throw the Light from right ahead to 2 Points abaft the Beam on the Starboard Side; and of such a Character as to be visible on a dark Night, with a clear Atmosphere, at a Distance of at least Two Miles :

(c) *On the Port Side*, a Red Light, so constructed as to show an uniform and unbroken Light over an Arc of the Horizon of 10 Points of the Compass; so fixed as to throw the Light from right ahead to 2 Points abaft the Beam on the Port Side; and of such a Character as to be visible on a dark Night, with a clear Atmosphere, at a distance of at least Two Miles :

(d) The said Green and Red Side Lights shall be fitted with inboard Screens,

projecting at least Three Feet forward from the Light, so as to prevent the Lights from being seen across the Bow.

Art. 4. Steam Ships, when towing other Ships, shall carry Two Mast-head Lights vertically, in addition to their Side Lights, so as to prevent them from other Steam Ships. Each of these Mast-head Lights shall have the same Construction and Character as the Mast-head Lights which other Steam Ships are required to carry.

Art. 5. Sailing Ships under weigh, or being towed, shall carry the same Mast-head Lights as Steam Ships under weigh, with the exception of the White Mast-head Light which they shall never carry.

Art. 6. Whenever, as in the Case of small Vessels during bad Weather, the Green and Red Lights cannot be fixed, these Lights shall be kept on their respective Sides of the Vessel, ready for instant Exhibition on the Approach of or to other Vessels, be exhibited on their respective Sides in sufficient Time to prevent Collision, in such manner as to make them clearly visible, and so that the Green Light shall not be seen on the Port Side, and the Red Light on the Starboard Side.

To make the Use of these portable Lights more certain and easy, each of them shall contain, and shall be provided with suitable Screens.

Art. 7. Ships, whether Steam Ships or Sailing Ships, when at Roadsteads or Fairways, shall exhibit, where it can be best seen, but not exceeding Twenty Feet above the Hull, a White Light, in a globe of Eight Inches in Diameter, and so constructed as to show a clear unbroken Light visible all round the Horizon, and at a distance of One Mile.

Art. 8. Sailing Pilot Vessels shall not carry the Lights required for other Vessels, but shall carry a White Light at the Mast-head, visible all round the Horizon; and shall also exhibit a Flare-up Light every Fifteen Minutes.

Art. 9. Open Fishing Boats and other open Boats shall not be required to carry the Side Lights required for other Vessels; but shall, if they do not carry any Lights, carry a Lantern having a Green Slide on the One Side, and a Red Slide on the other Side; and on the Approach of or to other Vessels, such Lantern shall be exhibited in sufficient time to prevent Collision, so that the Green Light shall not be seen on the Port Side, nor the Red Light on the Starboard Side.

Fishing Vessels and open Boats when at Anchor, or attached to the Wharf, shall exhibit a bright White Light.

Fishing Vessels and open Boats shall, however, not be prevented from exhibiting a Flare-up in addition, if considered expedient.

#### *Rules concerning Fog Signals.*

Art. 10. Whenever there is a Fog, whether by Day or Night, the Signals described below shall be carried and used, and shall be sounded at least Five Minutes; viz:—

(a) Steam Ships under weigh shall use a Steam Whistle placed in a funnel, not less than Eight Feet from the Deck:

(b) Sailing Ships under weigh shall use a Fog Horn:

(c) Steam Ships and Sailing Ships when not under weigh shall use a Bell.

#### *Steering and Sailing Rules.*

Art. 11. If Two Sailing Ships are meeting End on or nearly End on, the Helm of each shall be put to Port, so that they shall pass on the Port Side of the other.

Art. 12. When Two Sailing Ships are crossing so as to involve the Risk of Collision, then, if they have the Wind on different Sides, the Ship with the Wind on the Starboard Side shall give way to the other.

on the Port Side shall keep out of the Way of the Ship with the Wind on the Starboard Side; except in the Case in which the Ship with the Wind on the Port Side is close-hauled and the other Ship free; in which case the latter Ship shall keep out of the way: but if they have the Wind on the same Side, or if one of them has the Wind aft, the Ship which is to windward shall keep out of the Way of the Ship which is to leeward.

Art. 13. If Two Ships under Steam are meeting End on or nearly End on so as to involve Risk of Collision, the Helms of both shall be put to Port, so that each may pass on the Port Side of the other.

Art. 14. If Two Ships under Steam are crossing so as to involve Risk of Collision, the Ship which has the other on her own Starboard Side shall keep out of the Way of the other.

Art. 15. If Two Ships, one of which is a Sailing Ship, and the other a Steam Ship, are proceeding in such Directions as to involve Risk of Collision, the Steam Ship shall keep out of the Way of the Sailing Ship.

Art. 16. Every Steam Ship, when approaching another Ship so as to involve Risk of Collision, shall slacken her speed, or, if necessary, stop and reverse; and every Steam Ship shall, when in a Fog, go at a moderate speed.

Art. 17. Every Vessel overtaking any other Vessel shall keep out of the Way of the last said mentioned Vessel.

Art. 18. Where by the above Rules One of Two Ships is to keep out of the Way, the other shall keep her Course, subject to the Qualifications contained in the following Article.

Art. 19. In obeying and construing these Rules, due regard must be had to all Dangers of Navigation; and due regard must also be had to any special Circumstances which may exist in any particular Case rendering a Departure from the above Rules necessary in order to avoid immediate Danger.

Art. 20. Nothing in these Rules shall exonerate any Ship, or the Owner, or Master, or Crew thereof, from the Consequences of any Neglect to carry Lights or Signals, or of any neglect to keep a proper Look-out, or of the Neglect of any Precaution which may be required by the ordinary Practice of Seamen, or by the special Circumstances of the Case.

Excite the nostrils with snuff, hartshorn, and smelling salts, or tickle the throat with a feather, &c., if at hand. Rub the chest and face warm, and dash cold water, or cold and hot water alternately, on them.

If there be no success, replace the Patient on the face, raising and supporting the chest well on a folded coat or other article of dress.

Turn the body very gently on the side and a little beyond, and then briskly on the face, back again; repeating these measures about fifteen times in the minute, or once every four or five seconds, occasionally varying the side.

## 2.—EXPIRATION.

On each occasion that the body is replaced on the face, make uniform but efficient pressure with brisk movement, on the back between and below the shoulder-blades or bones on each side, removing the pressure immediately before turning the body on the side.

During the whole of the operations let one person attend solely to the movements of the head, and of the arm placed under it.

Whilst the above operations are being proceeded with, dry the hands and feet; and as soon as dry clothing or blankets can be procured, strip the body and cover, or gradually reclothe it, but take care not to interfere with the efforts to restore breathing.

---

## AFTER NATURAL BREATHING HAS BEEN RESTORED.

**TO INDUCE CIRCULATION AND WARMTH.**—Wrap the Patient in dry blankets and commence rubbing the limbs upwards firmly and energetically. The friction must be continued under the blankets or over the dry clothing.

Promote the warmth of the body by the application of hot flannels, bottles or bladders of hot water, heated bricks, &c., to the pit of the stomach, the arm-pits, between the thighs, and to the soles of the feet.

On the restoration of life, when the power of swallowing has returned, a teaspoonful of warm water, small quantities of wine, warm brandy and water, or coffee should be given. The Patient should be kept in bed, and a disposition to sleep encouraged. During reaction large mustard plasters to the chest and below the shoulders will greatly relieve the distressed breathing.
